Hello.

Excuse for my poor english, first. My name is Hwidge. I need informations about Radio. I got a Harvey-Wells T-90 Bandmaster, but the radio is incomplete. The power cables is missing. I need information about tension, current, power cables, power supplies. Here in Brazil Jungle is very difficult to get information about this ancient radio. I read your message in internet (04/22/97) where you talk about T 90 Harvey Wells. Please, help me.

Thanks (73/51)

e-mail

Hwidge.

WTB: MD-7 (ARC-5) Modulator etc.

Needed: one MD-7 modulator.

Or just the mod xfmr.

I could also use a driver transformer as follows:

Single plate to P-P grids, ratio 3:1 primary to 1/2 secondary
such as STANCOR A-4723

I could also use some newer electrolytic capacitors
in the 450V - 600V DC range.
